

## Notes from Open Space Topic Convenors

What was your topic or practice?

### The Law of Sufficiency

What were major discussion points?

- An appreciation that the principle of metamorphosis is that of sufficiency—the caterpillar becomes the pupa when it has sufficient material form from which the butterfly can develop fully, and not a molecule too many or too few—there is no waste in metamorphosis.
- A shared appreciation—this law can also be called the law of abundance.
- All systems share a common residual error constant that points to God (Chaos Theory).
- Are we “enough” in numbers to “do the work” of RCC and Healing Healthcare?
  - This law would suggest that we are.
- Humans seem to see themselves as not subject to or covered by the law.
  - Cf. Rudolph Steiner’s observation that according to the universal law, we are paid for doing our work, but we mistakenly believe that we do our work in order to get paid.

What did you learn?

- This appears to be a functioning “universal law” with many facets.

Whom should we contact for more information?

Name: Kenneth H. Hamilton  
Telephone: 207/743-7458  
Address: 646 Paris Hill Road  
South Paris, ME 04281-6318
